

# Custom Manufacturing of Vacuum Apparatus

ZÁK. ČÍSLO:

We specialize in the development and production of technically demanding, tailor-made vacuum assemblies.

Our systems are equipped with vacuum pumps, valves, vacuum reservoirs, cryogenic components, and elements with manual, electronic, or pneumatic control.

We provide end-to-end support from concept to series production:

- design and engineering based on your specifications
- preparation of manufacturing documentation
- prototype production
- small-batch and series manufacturing
