Diaphragm pump VM 20 D

Zák. číslo: 2302 00 0000

The vacuum pump is a source of underpressure or pump for non-aggressive and non-explosive, dirt-free gases and wherever pure oil-free operation is required. Pumps can be used in laboratories, health, food, packing facilities, and the like. The working chambers can be interconnected in parallel, thus increasing the transport volume to double or in series, when we reach a reduction in the limit pressure. For smooth running of the pump, we recommend equally load both chambers.

Technické údaje

Limit suction pressure at serial connection	< 2 kPa
Limit suction pressure at paralel connection	< 14 kPa
Pumping speed at 105 Pa at serial connection	20 – 5% l/min
Pumping speed at 105 Pa at paralel connection	40 – 5% l/min
Output hose	Js 6
Input hose	Js 9
Engine power	180W
Motor power supply	230V/50Hz
Weight	8 kg
